WhisperFlo®

The Standard In High Performance Swimming Pool Pumps

Quiet. Efficient. Durable.

Compare WhisperFlo® to any other high performance pump, and you'll hear the difference immediately. It's quiet...and quiet means quality.

Our proprietary hydraulic design, unique FunnelFlo™ diffuser, and high efficiency impeller work together to move water more efficiently than any other high performance pump. And the advantages don't end there. WhisperFlo's oversized strainer basket extends time between cleanings, and the unique Cam & Ramp™ lid is transparent and easy to remove, making inspection and cleaning simple and quick. Built with heavy-duty components that are resistant to chemicals and corrosion, WhisperFlo is a workhorse that will perform for years to come.

There's a WhisperFlo to suit any residential pool application, with 115v and 208/230v single-phase, and 208/230/460v three-phase pumps from ½ HP to 3 HP. Both standard and energy-efficient models are available. (Also available in 50-hertz models.)

With so many performance and convenience advantages, it's no wonder more than 2.2 million Pentair pumps have been installed worldwide.

Maximum Efficiency and Minimal Maintenance

High Efficiency

- Pentair's proprietary hydraulic design provides more water flow per horsepower than any other high performance pump for energy-efficiency.
- The FunnelFlo diffuser, high efficiency impeller, and energy-efficient motor work together to maximize flow efficiency and reduce operating costs.
- Available in single- and two-speed models, with low speed delivering the ultimate in energy efficiency.
- Two-inch inlet/outlet ports and anti-blocking strainer basket contribute to maximum water flow and efficiency.

ce

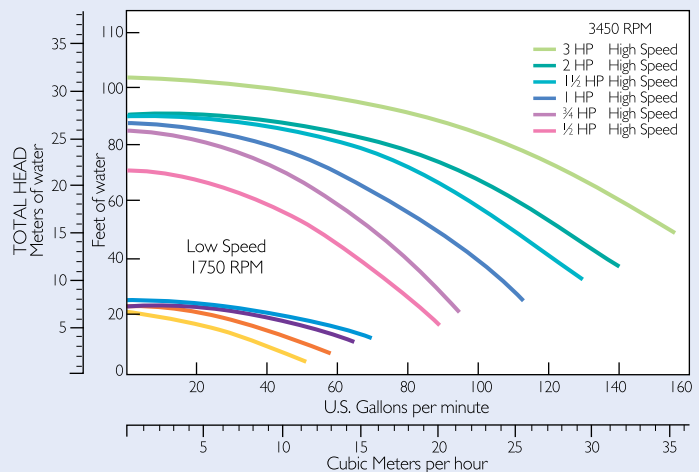

Durability

- WhisperFlo pumps are built to give pool owners year after year of trouble-free service. High-temperature, engineered thermoplastic materials withstand extreme heat and resist corrosion.
- Robust threaded connections for dependable, long-term performance.
- Commercial grade motor frame has a rustproof, stainless steel motor shaft and sealed bearings that never need lubrication.
- Large, flexible strainer basket stands up to chemicals and weather for years before replacement.

Easy Cleaning and Maintenance

- Cam & Ramp lid makes cleaning and inspection simple and quick.
- Oversized strainer basket extends time between cleanings.

Performance Curves

Six more good reasons to Partner with Pentair

You've heard the old saying, "Innovate or Perish." We take that to heart. And the innovations that boost energy-efficiency, ease operation and service, and add to the pool-owning experience just keep coming.

IntelliTouch® and EasyTouch® automation systems:

Provide push-button programming and hands-free control of all pool and spa equipment functions, as well as lighting systems. No systems are easier to operate or as technologically advanced.

FIBERworks® fiber optic lighting systems: Offering unsurpassed system design flexibility, wireless controls, and a host of elegant and contemporary fixtures that bring water and landscapes to life at night.

SAM® and SAL® color-changing lights: The first and still the brightest choice in automated color-changing lights for pools and spas.

IntelliChlor® automatic chlorine generator: Advanced digital technology allows monitoring and control of chlorine output with push-button simplicity. Built-in "intelligence" is a first.

MasterTemp® and ThermalFlo™ heaters and heat pumps: With heating equipment, it's all about efficient energy use, and Pentair's lineup beats competitive systems every time.

Automatic cleaners: For inground pools, choose from the legendary Kreepy Krauly® and double-action Pool Shark® suction side cleaners or from the Legend® series of pressure side systems. For aboveground pools, pick E-Z Vac® or Lil Shark™ cleaners. Nobody offers you more quality choices.

At Pentair, the best of everything from a single source is more than a promise. Visit with your representative today to learn more.

Because **reliability** matters most®
